Non-Government

[Fisek Institute](#) - "a non-governmental organization.The main focus of the Institute is social risk groups
(working children are given priority). The Institute's
establishment is based on the individual studies of its
founders in 1979, International Child Year. However,
its preparation studies at the organizational level
began in 1982. It is composed of Fisek Health
Services and Research Institute (established in 1986)
and its expert institution Fisek Institute Science and
Action Foundation for Child Labor (established in

1997)"
